Cash flow scenarios.

Our team has made reliable assumptions* for both the current and future cash flow of the property. **We make every effort to ensure this cash flow is as close as possible to year 1 expectations.** Based on market conditions, we recommend making assumptions for expenses rather than relying on the owner to provide them, as this approach is quicker. The actual expenses will be obtained during escrow. Additionally, it's worth noting that our assumptions include a 7% property management fee.

If we obtain actual expenses from the owner or listing agent we update our expenses to reflect what the owner is reporting.

Financing cash flow tables.

What is (MyLOAN)?

MyLoan is a loan table report for a single property. By employing common loan assumptions in the market, we can develop an estimate for the debt forecast. However, it's important to note that these assumptions are merely a rough approximation. During the escrow period, loan rates will be locked, and the loan-to-value (LTV) ratio may also vary depending on the property's size and debt coverage.
